

THE KENNEBEC ESTUARY:

RESTORATION CHALLENGES AND OPPORTUNITIES

Slade Moore, Biological Conservation

Jaret Reblin, Biology Department, Bowdoin College

August 2010

The Kennebec Estuary: Restoration Challenges and Opportunities

Commissioned by the Kennebec Estuary Land Trust, The Kennebec Estuary: Restoration Challenges and Opportunities was made possible with support by the Merrymeeting Bay Trust and Biological Conservation.

Support for finalization of this report was provided under appropriation # 013-07B-9050-008201-905001 by the U.S. Department of Commerce, Office of Ocean and Coastal Resource Management, under the Coastal Zone Management Act (CZMA) of 1972, as amended. CZMA is administered in Maine by the State Planning Office's Maine Coastal Program.

Table of Contents

<i>Acknowledgements</i>	4
Chapter 1: Overview of the Kennebec Estuary	5
Physical Overview	8
Ecological Overview	10
Communities and Species of Management Interest	14
Chapter 2: Water Quality	19
Assessing Water Quality in the Estuary	21
Conclusions	30
Chapter 3: Dominant Plant Communities	32
Submerged Aquatic Vegetation	33
Freshwater Tidal Marshes	39
Ecological Implications of Plant Community Shifts	43
Chapter 4: Diadromous Fish	46
Species Accounts	47
The Sturgeons	47
American Eel	51
Alewife and Blueback Herring	53
American Shad	56
Rainbow Smelt	57
Atlantic Salmon	58
Striped Bass	62
Ecosystem Implications	63
Chapter 5: Toxic Contaminants	67
Identifying and Monitoring Contaminant Risk	69
Contaminants of Particular Concern	70
Contaminants in Wild-Caught Foods	73
Ecological Concerns	80
Contaminants of Ongoing Ecological Research Interest	81
Chapter 6: Climate Change	85
Modeling Climate Change Projections	86
Ecosystem Impact Projections	90
Marshaling a Response to Climate Change	94
Chapter 7: Meeting The Challenge	97
Recalibrating a Restorative Vision	98
<i>Glossary</i>	100
<i>Literature Cited</i>	104
