

Founded by a bipartisan group of members of Congress, the Environmental and Energy Study Institute (EESI) has worked since 1984 to provide science-based educational resources to policymakers and the public. An independent 501(c)(3) nonprofit, EESI seeks to advance science-based solutions for climate change, energy, and environmental challenges in order to achieve our vision of a sustainable, resilient, and equitable world.

The Environmental Impacts of Data Centers Article Series
